IN THE CLAIMS

Please amend Claims 1, 8, 15, and 22 as follows:

1. (Three Times Amended) A system comprising:

an interface of a target application, the interface comprising a plurality of operations to be selected by a user;

a monitoring unit configured to directly monitor user selections of the plurality of operations of the interface by the user automatically upon start-up of the target application, and to generate a log of the monitored data, the log indicating the selections of the plurality of operations by the user;

a communicating device configured to communicate the log of the monitored data to a remote site.

8. (Three Times Amended) A system comprising:

interface means of a target application means, the interface means for providing a plurality of operations to be selected by a user;

monitoring means for directly monitoring user selections of the plurality of operations of the interface means by the user automatically upon start-up of the target application, and for generating a log of the monitored data, the log indicating the selections of the plurality of operations by the user;

communicating mans for communicating the log of the monitored data to a remote site.

Received from < > at 4/17/03 2:30:37 PM [Eastern Daylight Time]

15. (Three Times Amended) A method of monitoring usage of an interface of a target application, the interface including a plurality of operations to be selected by a user, comprising the steps of:

directly monitoring user selections of the plurality of operations of the interface by the user automatically upon start-up of the target application;

generating a log of the monitored data, the log indicating the selections of the plurality of operations by the user; and

communicating the log of the monitored data to a remote site.

22. (Three Times Amended) A computer program product comprising:

a computer storage medium and a computer program code mechanism embedded in the computer storage medium for causing a computer to monitor a user's usage of an interface of a target application, the interface comprising a plurality of operations to be selected by a user, comprising:

a first computer code device configured to directly monitor user selections of the plurality of operations of the interface by the user automatically upon start-up of the target application, and configured to generate a log of the monitored data, the log indicating the selections of the plurality of operations by the user; and

a second computer code device configured to communicate the log of the monitored data to a remote site.
